

IN THE CLAIMS

Please amend the claims as follows:

1-12. (CANCELLED)

13. (ORIGINAL) A heat exchanger component comprising:
a plurality of metal condensing flow passages having a surface; and
a film formed from a melted polymer applied directly to said surface.

14. (ORIGINAL) The heat exchanger component as recited in claim 13 wherein said film is thermoplastic.

15. (ORIGINAL) The heat exchanger component as recited in claim 13 wherein said surface is heated.

16. (ORIGINAL) The heat exchanger component as recited in claim 13 wherein said film is formed from a melted polymer selected from the group consisting of polyester, polyolefin, polyetherimide, polyethersulfone, polysulfone and polyimide.

17. (ORIGINAL) The heat exchanger component as recited in claim 16 wherein said film is formed of polyolefin and is mixed with a tackifier.

18. (ORIGINAL) The heat exchanger component as recited in claim 16 wherein said film is formed of polyolefin and is mixed with a maleated polyolefin.

19. (ORIGINAL) The heat exchanger component as recited in claim 13 wherein a roller adheres to said film to said surface of said plurality of condensing flow passages.

20. (ORIGINAL) The heat exchanger component as recited in claim 13 wherein a plurality of polymer pellets are melted to form said melted polymer.
